

Industry Partnerships for Environmental Science and Technology Conference

*Industry and University Programs: Opening EM Science
and Technology to the Entire Community of Science*

October 30-November 1, 2001

**U.S. Department of Energy
National Energy Technology Laboratory
Morgantown, West Virginia**

The **Industry Partnerships for Environmental Science and Technology** Conference will be held at the U.S. Department of Energy's National Energy Technology Laboratory (NETL) in Morgantown, West Virginia, on October 30-November 1, 2001. This technical conference is being sponsored by NETL to provide a forum for private sector organizations, potential users of technologies, and other interested parties to review the status of technology-based solutions being developed under the Office of Environmental Management/Office of Science and Technology's Industry Programs.

The conference will address technical accomplishments and technology needs, and lay the groundwork for future opportunities for partnerships and new solutions to EM's cleanup needs. Presentations, panel discussions, and poster sessions will feature the involvement of the private sector and universities to develop and deploy technologies that address environmental restoration and waste management needs at DOE facilities.

A tentative agenda and detailed registration information will be mailed to you in August. For continuing information, visit NETL's homepage at **www.netl.doe.gov** or contact NETL Event Management at **304-285-4750 / 1-800-553-7681 / confserv@netl.doe.gov**.

If you are interested in attending this conference and are not a U.S. citizen, please contact NETL Event Management as soon as possible for additional information on requesting a DOE unclassified visit.

*Hosted By The United States Department of Energy
